If you have spreadsheets that you don't want to share in your Google Drive when you connect your Google Sheet to Geckoboard, one solution is to create a direct download link. In Google Sheets, select File - Publish to the Web. In the pop-up mode, link to a .xlsx Excel file by clicking the Selected Web Page menu and changing it in Microsoft Excel (.xlsx). Then click Publish. Click OK if Google Drive asks if you really want to publish this selection? Copy the generated link in the modal. Go to Geckoboard and move the cursor over an empty area of your dashboard and click the + button. Alternatively, you can click Add Widget at the top right of your dashboard. A scrollable list of data sources is displayed. Click Excel. In Geckoboard, in the Link to File box, insert the copied link into the file. Our integration will do the rest. And that's it! You can now prepare a visualization using your spreadsheet data. Prima!

⌘ Thank you for your feedback! Published in: Google Apps Script - Google SheetsThis guide explains how to easily create and manage hyperlinks in Google Sheets. An entire cell in the sheet or specific text within the cell can be linked to external Web pages. A cell can also contain multiple hyperlinks.

When you enter a Web page address in a Google Sheet cell, it is automatically converted to a clickable hyperlink. You can add anchor text to simple hyperlinks for more accessible URLs. Hover over the hyperlink and click the Edit icon. Now insert the anchor text into the Text input box and click the apply green button. Alternatively, you can use the built-in HYPERLINK feature in Google Sheet to create web links with (optional) anchor text. =HYPERLINK(, Digital Inspiration)It is also possible to include multiple hyperlinks in a single cell of the Google Sheet. Simply type any text, insert URLs into plain text, and when you move the cursor out of the cell, the URLs are converted to hyperlinks. Bonus Tip: While a cell with multiple links is selected, press Alt+Enter and open all links at once in new tabs. You can use the previous technique to edit multiple hyperlinks in a single cell and add anchor text. Hover over a link in the cell, click the edit icon, and change the anchor text. Repeat for all other links in the same cell. See also Secret Google Drive URLs.Here are some snippets that will help you get your hyperlinks Google Sheets with Google Script macros.const createHyperLinkWithFormula = () =>{ . const link = '' ; const text = 'Digital Inspiration'; const value = '=HYPERLINK(\"link\"') const sheet = SpreadsheetApp.getActiveSheet(); const range = sheet.getRange('A1'); range.setValue(value) 2. Create links with the RichTextValue builderconst createHyperLinkWithRichTextValue = () =>{ ' const link = ' ; const text = 'Digital Inspiration'; const value = SpreadsheetApp.newRichTextValue() SpreadsheetApp.newRichTextValue() .setLinkUrl(link) .build(); SpreadsheetApp.getActiveSheet().getRange('A1').setRichTextValue(value); .const createMultipleHyperLinks = () =>{ -const-value = SpreadsheetApp.newRichTextValue() .setText('Google acquired YouTube 2006') .setLinkUrl(0, 6, ' ') .setLinkUrl(16, 23, ' ') SpreadsheetApp.getActiveSheet().getRange('A1').setRichTextValue(value); *;const extractLinkFromFormula = () =>{ ' const sheet = SpreadsheetApp.getActiveSheet(); const range = sheet.getRange('A1'); const formula = range.getFormula(); const [, url, , text] = formula.match(/=HYPERLINK\('(.*?) ([;](.+?))? \)/) || []; Logger.log(url, text: text || url '); Extract multiple links and anchor text from a cellconst extractMultipleLinks = () =>{ . const urls = SpreadsheetApp.getActiveSheet().getRange('A1') .getRichTextValue().getRuns().map((run) =>{ , the url: run.getLinkUrl(), text: run.getText(), > .. Logger.log(urls); }); HYPERLINK - Docs Editors Help. Creates a hyperlink in a cell. Example usage. HYPERLINK (, google.com/,Google). Syntax. HYPERLINK(url, [link_label]). url - The full URL of Here is the formula that will insert the hyperlink of the Google homepage with Google as the link label. = HYPERLINK (, Google) When you use the hyperlink to hover over the cell, you will see the link you can click.
